

## Chocolate-bordered Flitter

[sanskritiias.com/pt-cards/chocolate-bordered-flitter-32](https://sanskritiias.com/pt-cards/chocolate-bordered-flitter-32)

- Chocolate-bordered Flitter, a new butterfly species has been discovered. The new butterfly also carries the scientific name *Zographetus dzonguensis*, after Dzongu in north Sikkim, the place where it was discovered.
- It is a golden yellow butterfly with brown borders and spots. The physical appearance of the species differ slightly and the internal structures of the males also differ slightly.
- Its closest relatives are *Zographetus pangi* in Guangdong, and *Zographetus hainanensis* in Hainan, both in southeastern China, close to Hong Kong
- It is mentioned on the 'Butterflies of India' website which is maintained by the National Centre for Biological Sciences (NCBS), Bengaluru.
