

Forum for Decarbonizing Transport

 sanskritiias.com/pt-cards/forum-for-decarbonizing-transport-8

- NITI Aayog and World Resources Institute, India, jointly launched the 'Forum for Decarbonizing Transport' in India as part of the NDC-Transport Initiative for Asia project. **The project aims at bringing down the peak level of GHG emissions (transport sector) in Asia (in line with a well below 2-degree pathway)**, resulting in problems like congestion and air pollution.
- The Forum for Decarbonization of Transport will act as the conduit for bringing diverse voices and needs to adopt an integrated approach for greening the transport sector in India. **India has a massive and diverse transport sector, which is also the third most CO₂ emitting sector.** According to IEA and Ministry of Environment Forest and Climate Change road transport contributes to more than 90% of the total CO₂ emissions.
- Through various policy measures and initiatives, the Government of India is continuously working towards the decarbonisation of road transport, with a major focus on the adoption of electric vehicles (EVs) in the country.
- **The NDC Transport Initiative for Asia is a joint programme of seven organisations that will engage China, India, and Vietnam in promoting a comprehensive approach to decarbonizing transport in their respective countries.** It is funded by the International Climate Initiative of the German Ministry for the Environment, Nature Conservation and Nuclear Safety. **NITI Aayog is the implementing partner for the India component of the project.**
