

Yellow Weaver Bird

sanskritias.com/pt-cards/yellow-weaver-bird-21

- Yellow Weaver Bird, is a species of weaver bird. It is **mainly found in Terai plains of Uttarakhand and Uttar Pradesh**. These birds **live in open areas having rare trees and prefer wet areas**.
- Male bird is yellow with dark cheek patch while female's color is mainly brown. **Male birds make ball-shaped nests**.
- **Their population is less than 500 in India**. Their habitat have been disturbed because of agriculture and development works, which is the main reason of their declining population.
- **In December 2021, IUCN placed it in endangered category from vulnerable category of its red list**.
- **The Uttar Pradesh government has planned to start a program for their conservation and breeding in 'Hastinapur Wildlife Sanctuary'**.
